

AQUAMATS®

The most efficient solution to improve your profitability, save water and move toward sustainability.

Advantages

- Labour savings of 80-92% compared to hand watering
- Water savings up to 80% (no run-off)
- Fertilizers savings of 50% (no run-off, no leaching)
- Does not interfere with customer activities during the day
- Less plant shrinkage due to missed watering cycles
- Great product for unskilled labour knowledge
- No water spray or run-off provides a cleaner sales area
- No flower or foliage damage vs overhead or hand watering
- No 'sun-burned' foliage due to overhead watering
- Less foliage disease (black spot, mildew, botrytis etc)

- 1 Root and algae resistant cover
- 2 Evaporation block layer
- 3 Super absorbent felt
- 4 Total containment barrier = No Runoff

Sub-irrigation capillary mats uses:

- Flowers, perennials, shrubs, evergreens, small trees
- Can be used on benches and on the ground
- Custom made sizes to fit your needs

Perfect for retail operations:

- University of Nevada experiment says the labour-saving alternative to hand-watering in a retail operation will compensate for the initial investment in less than 1 year. (Hortitechnology April-June 2008)
- University of Nevada also says that plants of different size and water requirement can be placed on the same mat to meet different watering needs
