

Overhead Watering System

- Allows employees to water more area, for more coverage in less time
- Creates a professional environment • Healthy, longer lasting product
- Less water consumption • Low maintenance cost

Outfront has designed and installed custom irrigation solutions for hundreds of unique locations. These turnkey systems are designed specifically to meet the individual needs of shade structures, gutter connected greenhouses, under the canopy and in the open areas requiring a freestanding structure. Assembled from top quality components, manufactured specifically for demanding indoor/outdoor conditions, these systems are built to perform.

Overhead Irrigation for 20' by 20' Shade Structures
 Starter [IR-SH2020](#) Add-on [IR-SH2020A](#) 24" Wand [IR-RWK](#)

Custom designed or KIT Overhead Irrigation Systems are available. Kits are configured with 20' of track and are based on the height of hose loop available to hang down in your location. Add-on to starters for desired length of your garden centre.

2' Loop Kit	Starter	IR-OH2002
	Add-On	IR-OH2002A
4' Loop Kit	Starter	IR-OH2004
	Add-On	IR-OH2004A
6' Loop Kit	Starter	IR-OH2006
	Add-On	IR-OH2006A

Improves safety by removing hoses from aisles
